

## Product Data Sheet

Part # 17001

### Automatic Transmission Treatment

Soltec™ Automatic Transmission Fluid Treatment is an additive that contains a special detergent package to fortify ATF against oxidation, acid formation and breakdown due to thermal stress. Contains shear-resistant viscosity stabilizers and pour-point depressants for cold-weather operation. This “universal” conditioner is designed for use in the newest generation of ATF, including Dexron III, Mercon V, Chrysler and Allison C-4.

- Helps fortify ATF against oxidation and acid formation.
- Helps keep seals soft and pliable.
- Helps prevent leaks.
- Helps prevent the formation of sludge and varnish.
- Contains shear-resistant viscosity stabilizers to help maintain smooth shifting.

#### **Application:**

Add to transmission at each service or when needed. Use between ATF fluid-exchanges.
