

Product Data Sheet

Part # SG-X11

Fuel Induction Plastic Applicator:

NEW Soltec® Patent pending “Simple Grip” applicator easy to use, easy to see product and mist as it enters the vacuum source of the vehicle.

- Transparent bottle with grip dimples that help the technician hold the bottle and helps to prevent slippage.
- The bottle holds up to 16 oz and helps to prevent spillage if the bottle is tilted toward either side.
- This applicator is vacuum feed and not gravity feed - this eliminates the possibility of filling a cylinder with product if the engine is off and the valve open.
- The surgical drip tube is visible and needs to be set to a steady drip and not a solid stream. There is a "Y" in the line to help atomize the product application that helps do a better cleaning.

Application:

Induction tool to be utilized with induction system cleaner, pour contents into bottle, connect to a vacuum source after throttle body. Run vehicle at 1200 to 1500 rpm, set valve on Induction tool to have a fast drip on site glass of the applicator.

*** Patent pending exclusive “Simple Grip” design.**
