

Product Sheet

Refrigerant recovery/recycling and recharge machine

Our Refrigerant Management Center quickly and efficiently recovers, recycles and re-charges the automotive AC system, our new Ergonomic design meets SAE J3030 for use in R1234yf and R134a systems, with our patented unique refrigerant changeover system, this machine can be changed over quickly to perform services on two different types of refrigerant.

Our patented motor controlled ball valves opens wider for greater flow and is resistant to clogging of debris or sealants.

Our 2/3 HP Oil-less compressor is designed and built for high capacity commercial applications, eliminates failure issues due to improper oil filling of traditional compressors.

Features / Benefits

- 7" color touch screen control panel
- Certified to meet SAE J3030 for use in R134a & R1234yf systems
- Patented motor controlled ball valves
- Patented 2/3 HP oil-less compressor
- Hybrid compatible
- Thermal printer
- Displays maximum load up to 220 lbs.
- Refrigerant management system monitors filter Life and refrigerant usage
- Patented unique, fast and complete refrigerant Changeover system
- Internal refrigerant identifier
- 6 cfm vacuum pump
- 1-2-5 Warranty
- Temperature probe
- Car Health mode enables printing a snap shot Of pressures before and after service.
- Vehicle data base included
- Recovery rate = Up to 1 lb/min

Specifications

Dimensions: 60" H x 27.5" W x 25" D
Weight: 240 lbs.
Power: 115 VAC 850W

Part # 93110

Case Weight: 1ea / 240 lbs.
