

SMART-TECH II TRANSMISSION FLUID EXCHANGER

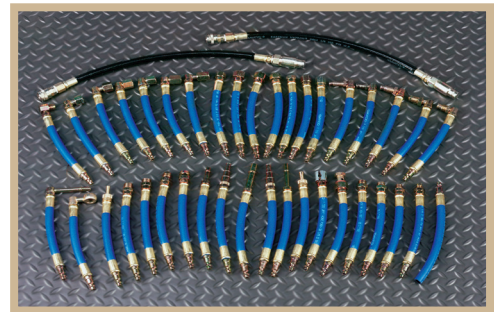

The Soltec® Smart-Tech II Automatic Transmission Fluid Exchanger with Onboard dispensing machine can be used to thoroughly remove the old fluid from a vehicles transmission while replacing it with new fluid by connecting to the transmission cooler lines or through the dipstick tube where applicable. It allows the user to perform the service with very little effort. The new LCD display shows the user step by step how to properly perform the fluid exchange service. This new machine also allows the user to dispense additives into the transmission through the built in feature on the side of the machine.

Part #95900 - on board additive dispenser

FEATURES / BENEFITS
