

SOLTEC PNEUMATIC BRAKE FLUID EXCHANGER

Packed full of features that allows a complete brake system fluid exchange to be performed on most vehicles in less than ten minutes.

Part # - 98540

OVERVIEW

The Air Brake Machine combines an innovative design with unparalleled functionality. Made of a high-impact resin, this machine is built to withstand the rigors of daily use in the shop while remaining lightweight and portable. Its 64 oz. fill tank ensures you have an ample supply of fluid to complete any service, while the impressive 5-gallon waste tank means you can tackle multiple fluid exchanges without constant emptying.

The advanced, dual-action system simultaneously removes old, contaminated brake fluid while effortlessly injecting new, clean fluid into the system. Additionally, the built-in air drier prevents any unwanted moisture from entering the new fluid reservoir, guaranteeing that the new fluid remains uncontaminated and reliable.

New fluid pressure output can be adjusted from 0 to 100 PSI, giving the technician full control over the exchange process, making the machine compatible with a wide range of vehicles and brake systems. The oversized service waste hose filter prevents debris from entering machine pumps and extends service life.

Trust in the Air Brake Machine for a hassle-free and effective solution to brake fluid maintenance, ensuring every vehicle stops with precision and safety.

KEY FEATURES

- Compressed air operation
- Quick-Disconnect Adapters
- Adjustable Tank Pressure Regulator 0 to 100 psi
- Single Bleeder Hose for easy operation
- Fluid reservoir w/ suggested wheel stop points
- Includes adapter kit #98485

EQUIPMENT SPECIFICATIONS:

Dimensions:	38.5" x 18.5" x 24"
Weight :	80 lbs.
Chassis:	Low-density polyethylene
Power:	Shop Compressed Air
Used Fluid Capacity:	5 gallons
